Instructions to test connection to ZOOM client

Remote connections for your meeting will be made through our ZOOM client.
Please test this connect prior to the meeting by clicking on the link below.
https://gemini.zoom.us/j/573479609 (This same link will be used for your meeting.)

When you click on the link, you will see a window requesting that you launch the application.

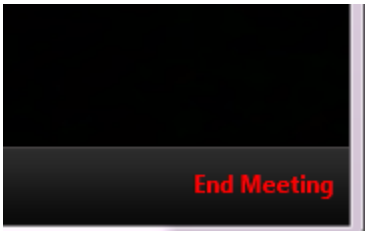

Click on the “Launch Application” encircled in red in the graphic above and you should see a window within the ZOOM window that looks like this.

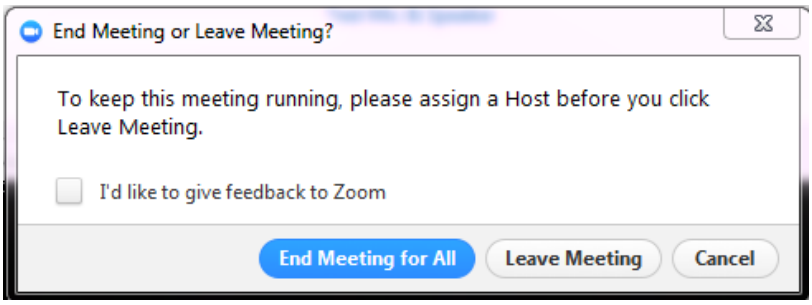

Please test your mic and speakers. After you have done so, you can close your mic and speakers test window.

You will then return to the Zoom window. Please click the red “End Meeting” button in the lower right corner. It looks like this.

Clicking on “End Meeting” will bring you to another window that looks like this:

Please click on “Leave Meeting”. Do not click on “End meeting for all”.

You will then have completed your test. You will need to click on the ZOOM link again to join the meeting. It is the same link that you just tested and is in the attached meeting invitation.
